Investment Principles

Our search for quality & value never ends.

Our three investment principles inform every investment decision we make.

01

We champion investors.

We believe that if investors win, we all win.

We are independent minded which allows us to make investment decisions with the focus on helping investors meet their financial goals.

Investment decisions are made with the end investor in mind.

02

We take a fundamental approach.

We believe that fundamental factors, such as the quality of personnel and an investment's future earnings will drive results.

Powerful analytics and models are behind our research and portfolios, giving us the confidence to take a long-term perspective.

We stand firm behind our investment views, even if they are unpopular. This means being willing to ride out market volatility.

03

We believe that price matters.

We anchor on an investment's underlying intrinsic value rather than fleeting news, sentiment or momentum.

Focusing on the difference between price and intrinsic value enables investors to get more than they're paying for.

We also believe controlling costs helps investors build wealth by letting them keep more of what they earn.
