Portfolio	12.90	-46.34	0.80
S&P/ASX 200 TR AUD	13.32	-47.18	1.00

Sector Exposure

Notes:

1) Management fees can be negotiated and may be less than the standard management fee.
 2) Investment performance is before tax and after the standard management fee of 0.65% (inclusive of GST). Investment performance is shown from 31/08/2001 and represents modelled performance only and assumes income received is reinvested. An individual investor's performance will differ from the modelled performance depending on factors such as transaction timing, actual management fees, whether income is paid and any divergence from model portfolio weightings.

Investment Objective

The Morningstar Australian Shares Income Portfolio aims to provide investors with greater risk-adjusted returns and a higher sustainable franked dividend yield relative to the S&P/ASX 200 Accumulation Index in the long term.

Investment Strategy

The portfolio is actively managed and concentrated consisting of ASX-listed stocks covered by Morningstar's large Equity Research team. Morningstar focusses portfolio exposure on companies with competitive advantages, a market price offering margin of safety, a sustainable dividend yield above the benchmark, and franking credits. This combination of factors helps to preserve capital and reduce volatility in various market environments.

Portfolio turnover is modest to minimise costs and further support after-tax performance. Morningstar Equity Research analysts' ratings, such as Fair Value Estimate, Economic Moat, and Valuation Uncertainty, are important inputs to the portfolio construction process. Total return will tend to be driven more by income than capital appreciation, although both are of course desirable.

Sector Contribution Over the Past Year

Note: Contribution to return from ETFs has been calculated using NAV returns. Contribution analysis is calculated using a monthly buy and hold methodology.

Portfolio Holdings

Franking (%) (est): 73.0% | Div Yield (%): 4.4%
