The fund aims to earn a rate of return that exceeds the Consumer Price index by at least 4.0% pa over a rolling 7 year periods.

Investment Strategy

A multi-asset Fund designed to take full advantage of current market valuations by investing in a high conviction portfolio of the most attractive assets on a reward for risk basis. Unlike more traditional diversified funds, the Fund is not constrained by a specific strategic benchmark or index. Underpinning the portfolio is an overarching focus on capital preservation over the targeted investment horizon. To construct the portfolio, the Fund can hold investments in managed funds, direct securities, exchange traded funds, foreign exchange contracts and derivatives. The composition of the Fund, including exposure to growth and defensive assets, is expected to change over time, taking advantage of opportunities arising from mispriced markets.

Past performance is not a reliable indicator of future performance.
 Returns over 12 months are annualised.

Month-end Asset Allocation

Contribution Over the Year

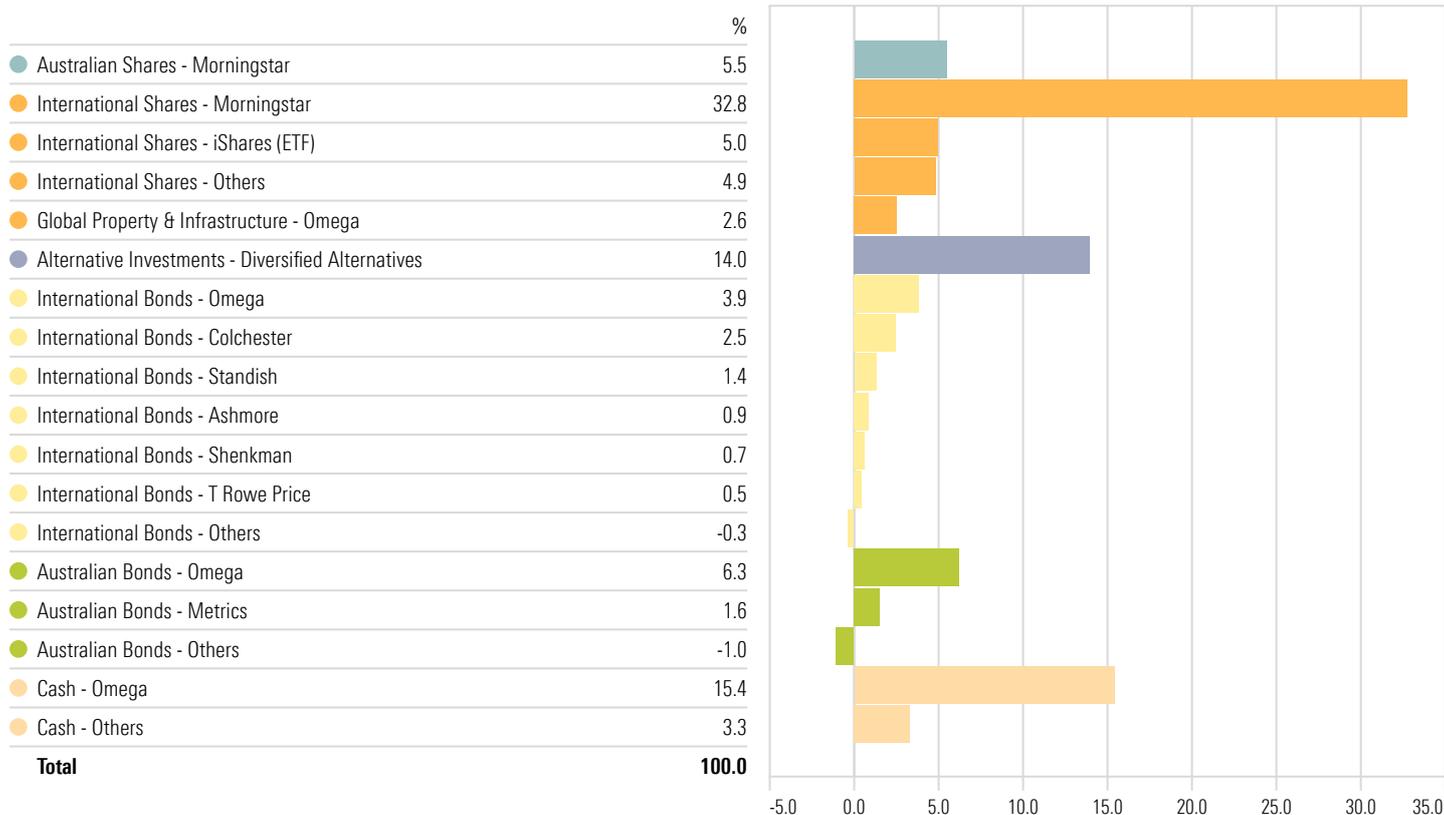

This chart shows how the individual parts of the portfolio contributed to investment performance over the past year. A monthly buy/hold methodology has been used and therefore the sum of the asset class returns in this chart would not necessarily equal to the total performance of the Fund.

1. The Fund's inception date used is 1 January 2010, the start of the full implementation of the Valuation Driven asset allocation process. 2) Management fees can be negotiated and may be less than the standard management fee. The portfolio may include exchange traded funds which charge management fees and these are an additional cost to individual investors and impact their return. This and any other indirect costs incurred by the portfolio is captured within 'Management Costs' above. 3) Investment performance is before tax and after the standard management fee (inclusive of GST). 4) The CPI was not available for the current period at the time of creation. CPI for the same period of previous year has been used as a proxy for the current period. Please note the actual CPI for the current quarter will differ to the proxy used.
