Portfolio	2.05	1.25	-0.29	-0.70	3.25
CPI + 0.75%	2.45	2.64	0.69	0.27	2.46

Past performance is not a reliable indicator of future performance. Returns over 12 months are annualised.

### Risk Since Inception

	Std Dev	Max Drawdown	Sharpe Ratio
Portfolio	1.99	-1.73	0.54

### Asset Allocation

### Investment Objective

The Morningstar Conservative Portfolio aims to achieve a consistent income return by investing in a diversified portfolio of predominantly defensive asset classes, with a small proportion of growth assets. The portfolio aims to earn a rate of return that exceeds CPI increases by at least 0.75% per annum over rolling 2 year periods.

### Investment Strategy

An actively managed diversified portfolio of securities across both defensive asset classes, such as cash and fixed interest securities, and growth asset classes such as Australian equities, property and global securities.

In general, the portfolio's long term average exposure will be around 85% defensive assets and 15% growth assets, however the allocations will be actively managed within the allowable ranges depending on market conditions.

The portfolio is designed for investors seeking a consistent income return whilst preserving the value of their capital.

### Asset Class Contribution Over the Month

1) Management fees can be negotiated and may be less than the standard management fee. The portfolio may include exchange traded funds which charge management fees and these are an additional cost to individual investors and impact their return. 2) Investment performance is before tax and after the standard management fee of 0.55% (inclusive of GST). Investment performance represents modelled performance only and assumes income received is reinvested. An individual investor's performance will differ from the modelled performance depending on factors such as transaction timing, actual management fees, whether income is paid and any divergence from model portfolio weightings. 3) The CPI was not available for the current period at the time of creation. CPI for the same period of previous year has been used as a proxy for the current period. Please note the actual CPI for the current quarter will differ to the proxy used.
