How is the portfolio managed?

We invest your money with the following in mind:

Value

The potential for return is greater and loss is lower over the long term if you purchase investments that are currently overlooked or under appreciated by other investors.

Reward for Risk

By focusing on undervalued investments and decreasing the allocation to those that are overvalued, we aim to deliver more consistent returns with lower risk than traditional approaches. In addition, we're happy to hold higher than normal levels of cash in wait for more compelling opportunities.

True Diversification

You're less exposed to the risks of investing when your money is spread across a mix of different investments (like shares, property, bonds and cash) that complement each other. In other words, simply holding more of the same/similar thing isn't the same as true diversification.
