Investment Strategy

The Portfolio has exposure to a diverse mix of managed investments, which include primarily defensive and some growth assets. Over the long term, the Portfolio aims to have a 70% allocation to defensive assets and a 30% allocation to growth assets.

The portfolios are constructed using managers that achieved a Morningstar Medalist Rating and will seek to optimise the exposure to active and passive management, only using active management where the probability of the medalist universe achieving a reasonable excess return for the asset class is greater than the probability of underperformance.

The Portfolio aims to reduce the probability of a negative return through a high exposure to more defensive assets.

The Portfolio is constructed around an asset allocation based on the strategy's objectives. It is reviewed regularly with the asset allocation, fund selection and portfolio construction assessed against changes in market conditions. The asset allocation, fund selection and blending of managed funds are actively managed with a strong focus on risk.

Fund managers, their funds and the construction of the Portfolio are regularly reviewed for suitability and market conditions.

*Investment performance represents modelled performance only and assumes income received is reinvested. Investment returns are calculated before tax and after management fees which are inclusive of GST. An individual investor's performance will differ from the modelled performance depending on factors such as transaction timing, actual management fees, whether income is paid and any divergence from model portfolio weightings or holdings. The portfolio may include Funds (including Exchange Traded Funds) which charge management fees and these fees are an additional cost (captured within the indirect costs) to individual investors and impact their return. ^Effective 1 November 2025, the constituent benchmarks used in the construction of the Portfolio's composite benchmark are provided by Morningstar, Inc. Historical benchmark returns up to 1 November 2025 will remain unchanged. Morningstar, Inc., operates Morningstar Indexes, which is a separate business unit to Morningstar Investment Management. Morningstar Investment Management is not involved in the construction, methodology, or maintenance of Morningstar Indexes. ^^ Morningstar Multisector Moderate Category Average.

Investment Principles

Our search for quality & value never ends.

Our three investment principles inform every investment decision we make.

01

We champion investors.

We believe that if investors win, we all win.

We are independent minded which allows us to make investment decisions with the focus on helping investors meet their financial goals.

Investment decisions are made with the end investor in mind.

02

We take a fundamental approach.

We believe that fundamental factors, such as the quality of personnel and an investment's future earnings will drive results.

Powerful analytics and models are behind our research and portfolios, giving us the confidence to take a long-term perspective.

We stand firm behind our investment views, even if they are unpopular. This means being willing to ride out market volatility.

03

We believe that price matters.

We anchor on an investment's underlying intrinsic value rather than fleeting news, sentiment or momentum.

Focusing on the difference between price and intrinsic value enables investors to get more than they're paying for.

We also believe controlling costs helps investors build wealth by letting them keep more of what they earn.
