**Why invest in this portfolio?**

To help achieve your financial goals with a diversified portfolio of highly rated fund managers, selected on investment merit and designed to complement each other in a portfolio.

**Global Research & Resources**

Access to the global resources and decades of experience of Morningstar's independent research and asset allocation capabilities to access a professionally managed portfolio.

**Benefit of a Managed Account**

The managed account structure allows for transparency over the holdings, and investors maintain direct ownership of the underlying funds within the portfolio.

**Efficiency**

To spend more time with your client by reducing your compliance and administrative burden, paperwork and delays.

**Who is managing the investment?**

By drawing on the combined research, experience and track records of Morningstar Manager Research and Morningstar Investment Management, the portfolio brings together our powerhouses in research, investment data and investment management.

\* Fee includes GST but not Recipient Input Tax Credits (RITC). Depending on the administration platform used to access these portfolios, RITC will be credited to the investor account up to the value of 75% of the GST payable. See the Platform PDS for more information.  
<sup>^</sup> Approximate fee including GST but not Recipient Input Tax Credits (RITC). Depending on the administration platform used to access these portfolios, RITC will be credited to the investor account up to the value of 75% of the GST payable. Morningstar look for opportunities to negotiate the use of lower fee share class funds where these are made available to us by fund managers. Some however may not be available depending on your chosen platform and, where these are not available, we have rebate arrangements in place. See the Platform PDS for more information.

## How is the portfolio managed?

We invest your money with the following in mind:

### Long-Term Perspective

The portfolio's strategic asset allocation (SAA) is managed to adapt to changes in market conditions within our long-term investment approach.

### Managed Volatility

Morningstar applies an SAA framework to determine the ideal portfolio construction intended to achieve the return objective over the investment time horizon, with a preference for lower volatility strategies in each asset class.

### Active-Passive Optimisation

We seek to optimise the portfolio's exposure to active and passive managers. We only take the risk of appointing an active manager if we believe we will be adequately rewarded from an expected return perspective. The reward we demand from more volatile asset classes is higher than less volatile ones.

### Cost Effective

Portfolios are continually reviewed, considering the cost versus benefit. Managers are selected and measured over the appropriate time horizon for their strategy, and consistent with Morningstar's principle of investing for the long term.

### Quality

Morningstar's Manager Research team identifies the preferred active strategies in each asset class using their Medalist ratings system. Morningstar's investment team then takes a total portfolio approach to ensure that risk management is a core focus throughout the process.
